A family business on the road to success

As a medium-sized, family-run logistics company operating throughout Europe, we stand for customized solutions and logistics concepts covering all aspects of the transport and handling of liquid goods by road and in combined transport - reliable, clean, safe and on schedule.

Our highly motivated and specially qualified employees contribute significantly to the success of our company with their experience and expertise.

Whether in administration, the workshop, tank cleaning or on the road – in our company everyone is part of the big family.

Together we share our passion for logistics!

Management: Christian Cornelius and Heino Anhalt

Our principles

Looking ahead

As a medium-sized logistics company, the long-term orientation of our business is particularly close to our hearts. As a family business, we also understand how to pull together to achieve common goals. In doing so, we act in accordance with our company philosophy and the associated corporate values. Our focus is not only on economic, but also on social and ecological sustainability goals.

Our company philosophy

Anhalt, the name stands for tradition, modernity and future.

Our success and our consistency are defined by acting goal-oriented and responsibly as well as constantly striving for 1A-quality.

In our company everyone is a part of the big family. Friendliness, reliability, and fun create a very good atmosphere and strengthen the team spirit.

Safety is a fundamental requirement for us in all areas.

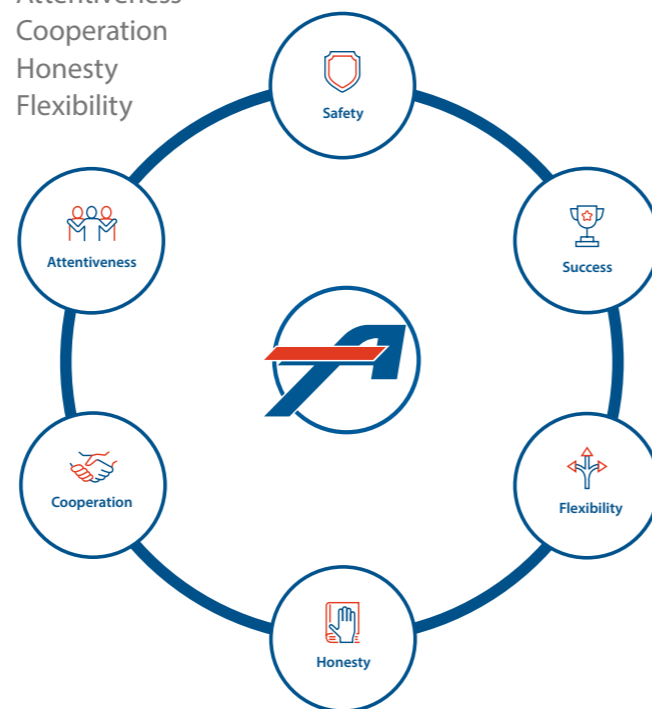

Being highly flexible, we are up to every logistical challenge - we share a passion for logistics!

Honesty and responsible conduct go without saying for us and are an integral part of our corporate culture.

Our corporate values

The following values represent the core of our family business:

- Safety
- Success
- Attentiveness
- Cooperation
- Honesty
- Flexibility

Sustainability & 1A-quality

Ecology

We bear responsibility for nature and the environment

Social responsibility

People are at the centre

Economy

The future of our logistics company

We are currently certified for our logistical transport and tank cleaning services and are happy to comply with our reporting obligations.

We provide high-quality logistics services and promote the responsible and sustainable treatment of the environment and people so that the needs of future generations are also ensured.

To this end, for example, we are shifting a large number of our transports from road to environmentally friendly rail alternatives in order to sustainably reduce the CO2 emissions of our fleet.

With our quality management we ensure that

- processes are optimised and documented.
- legal requirements are complied with.
- we meet our 1A-quality standards.
- we can respond to the individual wishes and needs of our customers.
- we are constantly developing and improving.

Transports

By road, rail or sea

By road, rail or sea

Whether by road, rail, or sea - we offer you a variety of sustainable transport options with the most modern and latest technical equipment.

Whether hazardous goods or not - we bring your product safely, efficiently and on time to its destination.

Chemicals

With our stainless steel and composite tank containers, our single and multi-chamber tank trailers as well as various components of pumps and metering installation, we offer you a comprehensive selection of transport equipment.

As standard, our tank containers are equipped with intelligent telematics (position and transport temperature) and can be heated with steam, hot water, or electricity. In our special tanks, we can transport products with transport temperatures of up to 220°C.

Frequently transported products

- AdBlue®
- Waste oil
- Resins
- Glues
- Mineral oil products
- Acids
- Surfactants
- Alcohols
- Liquid waste
- Lyes
- Solvents
- Paraffin
- Waxes
- ...

Food

As a certified logistics company with HACCP concept and Kosher certification, we are familiar with our customer's requirements and quality and hygiene regulations. Your product is only being transported in tanks exclusively intended for food transport.

In the field of food transport, we offer full truckloads in stainless steel tanks by our specially trained drivers.

Furthermore, we carry out the collection of fresh milk with calibrated measuring lines and are on the road for our customers 24 hours a day, 365 days a year.

Frequently transported products

- Alcohols (according to ADR)
- Fruit juice
- Glycerin
- Edible oils
- Vitamin oils
- Vinegar
- Glucose
- Milk
- Drinking water
- ...

Transports

By road, rail or sea

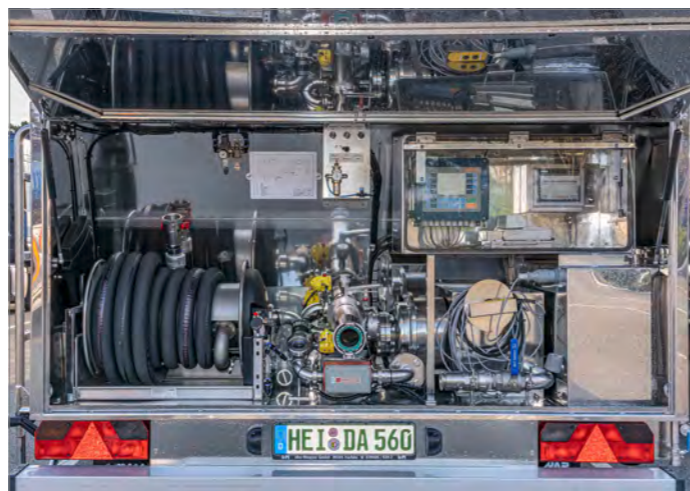

AdBlue®-Distribution

As Germany's largest AdBlue® carrier, we supply gas stations throughout Germany and neighbouring countries with AdBlue® for well-known chemical and mineral oil companies.

For distribution, we use modern tank trucks that comply with the current safety regulations of the mineral oil companies. AdBlue® is dispensed via calibrated measuring lines/hose reel systems.

Our transport capacities are distributed throughout Germany that we can serve our customers nationwide.

We would also be pleased to take over the complete planning of your orders. Please contact us without obligation.

Container Trucking

We offer container trucking services around our locations in Hamburg, Duisburg and Mannheim. For this business activity, we have more than 80 trucks and over 200 container chassis available.

We can offer you our trucks and container chassis in various versions. We also provide unloading hoses and mobile safety handrail for ISO containers and offer our container chassis as provision chassis.

Types of trucks

- ADR equipment
- Compressor
- Tipping hydraulic

Types of container chassis

- Box container: 20', 30', 40', 45' (foot)
- Tipping container: SWAP, 20', 40' (foot)
- Tank container: SWAP, 20', 30' (foot)
- Long-truck chassis combination

Depot & Services

Individual and comprehensive container services

As a reliable partner at your side, we offer you individual and comprehensive container services. With our own depots and tank cleaning facilities as well as our know-how in port logistics and customs clearance, we are well-positioned and can support you in many areas.

Container Depot

At our depot locations in *Hamburg* and *Duisburg* we offer our customers storage facilities for box and tank containers (full and empty containers).

Hamburg

Our depot in *Hamburg* is conveniently located close to all Hamburg sea terminals and the *Hamburg-Waltershof* freeway junction. Around 1,000 TEU can be stored here. In addition to container storage, we also offer container weighing (SOLAS), fumigation of containers and customs inspection at our Hamburg depot location.

We are also happy to organise all trucking activities from and to all terminals within the greater Hamburg area as well as the timely provision of your container at your customer's premises.

Duisburg

At our convenient location in *Duisburg* directly on the A 42, exit *Duisburg-Neumühl*, we offer the storage of empty containers.

Port Logistics

With many years of experience in port and sea container logistics as well as in the customs area, we will find the ideal logistics solution that suits your requirements. We offer everything around terminal handling, warehouse logistics and last-mile transport, both local and long-distance, as well as on the road or in combined transport.

Customs

As an authorized consignee and consignor, we can carry out customs clearance, T1 creation and change of custodian for our customers. In addition, we take care of the entire organization of the destruction of counterfeit goods under customs supervision. Please do not hesitate to contact us!
Contact: zoll@anhalt.de

Tank cleaning services

We offer the following tank cleaning services in our own cleaning facilities in *Bargen* and *Duisburg* as well as at our partner location in *Dollbergen*:

- Internal tank cleaning of your containers and tank trailers of food products and chemical products (on request)
- Heating of tanks with hot water and steam
- Outside cleaning

Cleaning outside opening hours is possible by arrangement.

Rental

We are happy to rent you tank containers with a capacity of 24,000 to 35,000 litres as well as the corresponding emergency/leakage trays.

Logistics concepts

A concept adapted to your individual needs

With our high degree of flexibility and our many years of experience, we are happy to take on any logistical challenge.

Together with you, we analyse existing processes, optimise them, and develop a perfect logistics concept according to your wishes.

In doing so, we rely on a close and personal exchange, target-oriented strategies, innovative projects, streamlined processes and successful cooperation with satisfied customers. As a competent partner at your side, we are at your disposal with our know-how for all logistical questions, advise you individually and accompany you from planning to implementation.

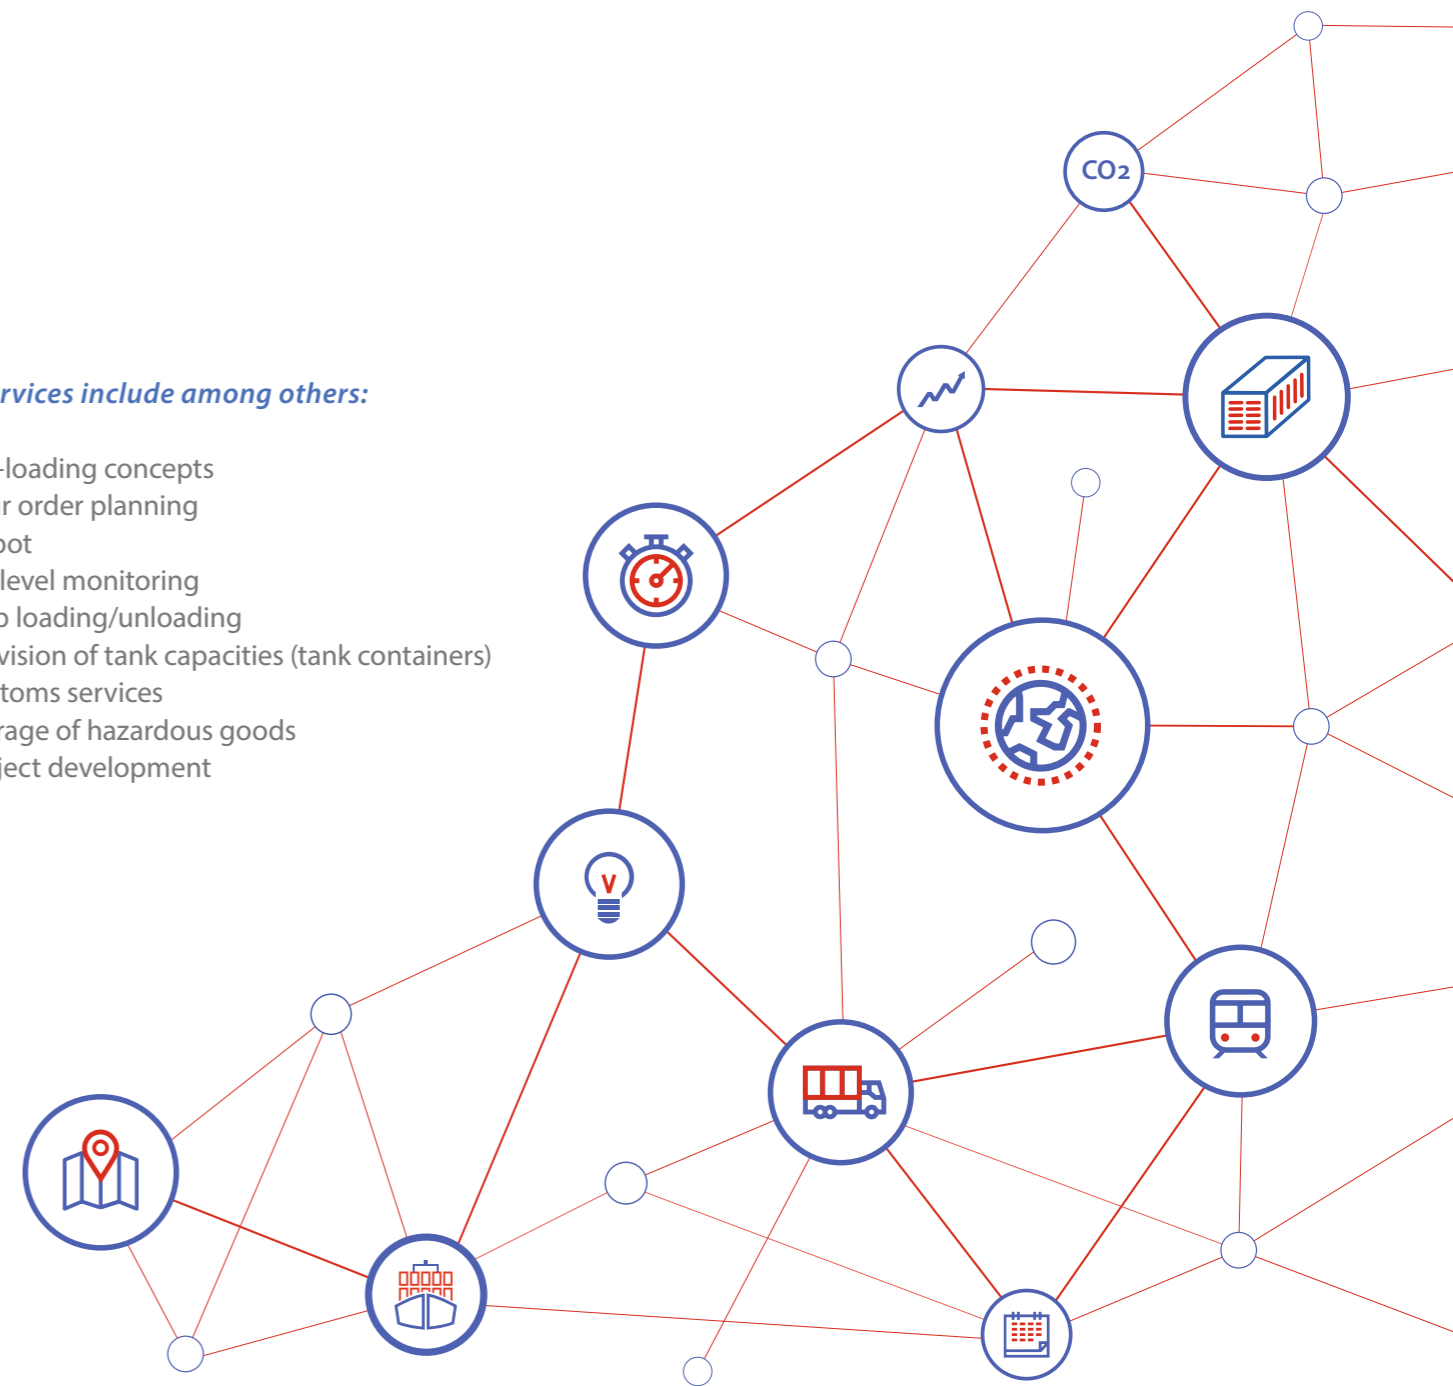

At the same time, we never lose sight of our quality standards and the existing safety aspects as well as our jointly defined goal.

Contact us directly and without obligation.
